IN THE CLAIMS:

Please cancel original claims 1-10 and rewrite them as new claims 11-30 as follows:

11. A clothes hanger comprising a hook and two arms projecting from it, wherein the arms are each formed by a bottle-shaped container.

12. The clothes hanger as claimed in claim 11, wherein each of the bottle-shaped containers is fastened by its mouth to the hook.

Clothes HangerBACKGROUND OF THE INVENTION

1. Field of the Invention

This invention relates to a clothes hanger with a hook and two arms projecting from it.

2. Description of the Related Art

FR-A-2 719 207 describes a clothes hanger with a hook and two arms projecting from it.

SUMMARY OF THE INVENTION

The object of the invention is to create a clothes hanger that preserves the shape of the articles of clothing hung on it and can nevertheless be manufactured very economically.

The invention teaches that this object can be accomplished by a clothes hanger of the type described above in which each of the arms is formed by a bottle-shaped container. Beverage bottles, among other things, have an essentially cylindrical shape with rounded edges and are extremely well-suited as supports for clothes. The drinking bottles provide a seamless and very protective support for articles of clothing. Used plastic beverage bottles are particularly well suited for use as the bottle-shaped containers. These bottles are very lightweight and yet retain their shape very well. The clothes hanger claimed by the invention is therefore particularly well suited for the recycling of used beverage
